

# How can I collect my mental health or learning disability prescription medication during the COVID-19 lockdown?

Any new prescription scripts will now be posted to patients. Patients will be asked to call their Community Mental Health or Learning Disability Team to confirm they have been received

Prescription medication can be collected from your local pharmacy as usual. Please comply with social distancing and maintain good hand hygiene throughout your journey

If you are socially isolating, you can have your medication collected and delivered by local volunteers. You can call your Community Mental Health Team or Learning Disability Team who can arrange this for you
